### Saalfeld Feengrotten – Display Mine

The Feengrotten has earned a proud place in the Guinness Book of World Records as the most colourful showcaves in the world. Today, it is one of the most popular tourist attractions in Thuringia and stands as an impressive testimony to mining in the Middle Ages.

Many centuries ago, the first miners began their search for gold, silver and other prized metals under the city of Saalfeld. However, it was alum shale that was discovered here, a mineral used for the processing of alum and vitriol. As the mineral was extracted, an underground cave was created which, over time, filled slowly with a fascinating dripstone world.

During your guided tour deep under ground, you will learn about the creation of the mine, the minerals, the stalactites and the stalagmites, as well as the life and times of the Medieval miners.
